15 January, 2013

Dear Parents,

You may have learnt from the media that a student of the secondary section had hurt herself last week. Fortunately, with the alertness of her fellow classmates, teachers and staff, the girl was well taken care of in time. She is now in hospital and is in good condition. As we are part of the Good Hope family, I would like to share this piece of news with you and hope that you will pray for the speedy recovery of the girl.

I have also written to the parents of the secondary students on what the School has done to help our girls at this difficult time. If you are interested, please refer to the Supervisor's letter to parents (13 Jan 2013) http://www.ghs.edu.hk/sec/letter130113.pdf on the webpage of Good Hope School .

The School has always aimed at nurturing a positive outlook on life with hope in our students. As Dr. Francis has pointed out in his talk, adolescence is a time of inevitable psychological changes, and teenagers do experience emotional disturbances from time to time which drive them to do something beyond their own understanding. The causes of turmoil may be entirely unknown to even themselves. The School is very concerned about developing the inner strength of our children as immunity against challenges of adolescence. This formation has to begin as early as primary one. However, this would not be successful without the close collaboration of parents.

I am now soliciting your support and let us work hand in hand to strengthen our children's positive attitude towards life and face adversity with courage. We are confident that our children will grow in wisdom and stature in the Good Hope spirit of love, hope, joy and thanksgiving, thanks to the devoted work of our staff and your valuable support, always.

God bless.

Yours sincerely,

Sr. Pauline MIC
Principal
